A Paradigm Change In

The Social, Economic, And Environmental Dimensions of Sustainable Development

Metro: A Philosophy of Sustainable Creation

Metro is more than simply a brand; it is a concept that holds that every design decision bears responsibility for both the present and the future. The peaceful beauty of each plank tiles conceals a greater story, one in which nature, craftsmanship, and invention intersect. Metro does more than just make flooring; we also provide a meaningful and long-lasting way to engage with the environment.

Our products are created from the earth, formed by humans, and perfected by technology, with each stage reflecting our dedication to sustainability. Metro Wooden and Ceramic Plank tiles embody our belief that genuine design is defined by the legacy we leave behind, which includes beauty, utility, and respect for nature.

Metro is more than just a material; it represents a philosophy of harmony. Harmony between artistic creativity and environmental responsibility. Harmony between innovation and tradition. Metro serves as a reminder that the spaces we design are not separate from the world around us; rather, they are extensions of it, carefully created, beautifully enduring, and leaving a lasting impact on the world we share.

Approx

23 Lakh 2025

Square meters of sustainable wooden plank tiles in

Replacing Real Wood For Greener Tomorrow.

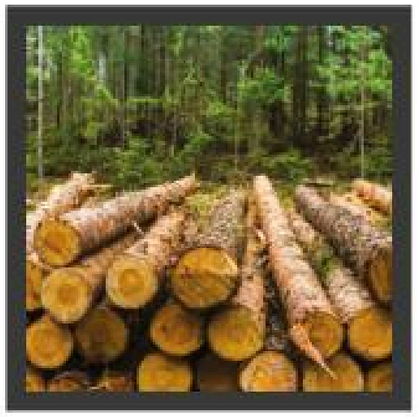

Metro Wooden Plank Tiles purpose is clear: to provide an eco-friendly alternative to genuine wood that protects the natural beauty of forests while satisfying the needs of modern architecture. With deforestation as a key worldwide issue, we work to create long-term solutions that lessen dependency on natural timber. Our wooden plank collections are created using cutting-edge technology and environmentally friendly materials to replicate the aesthetic appeal and warmth of real wood. By choosing Metro, you not only get high-quality, long-lasting products, but you also make a conscientious decision to conserve the environment for future generations. Together, we can build beautiful environments while protecting the Earth's important resources.

Metro aims to create approximately 23 lakh square meters of sustainable timber boards by 2025. This project will help rescue over 50,000 trees, strengthening our commitment to sustainability and environmental responsibility.

Wood Lovers

Always Strive To Deliver Charm Of Raw Wood & Epic Nature

Once, nature's raw beauty was all around us – the earthy scent of wood, the texture of untouched trees, the warmth of organic materials. It evoked a pure sensation of calm and connection. But as we move further into the modern age, we find ourselves distanced from this natural touch, surrounded by artificial elements that lack the essence of nature.

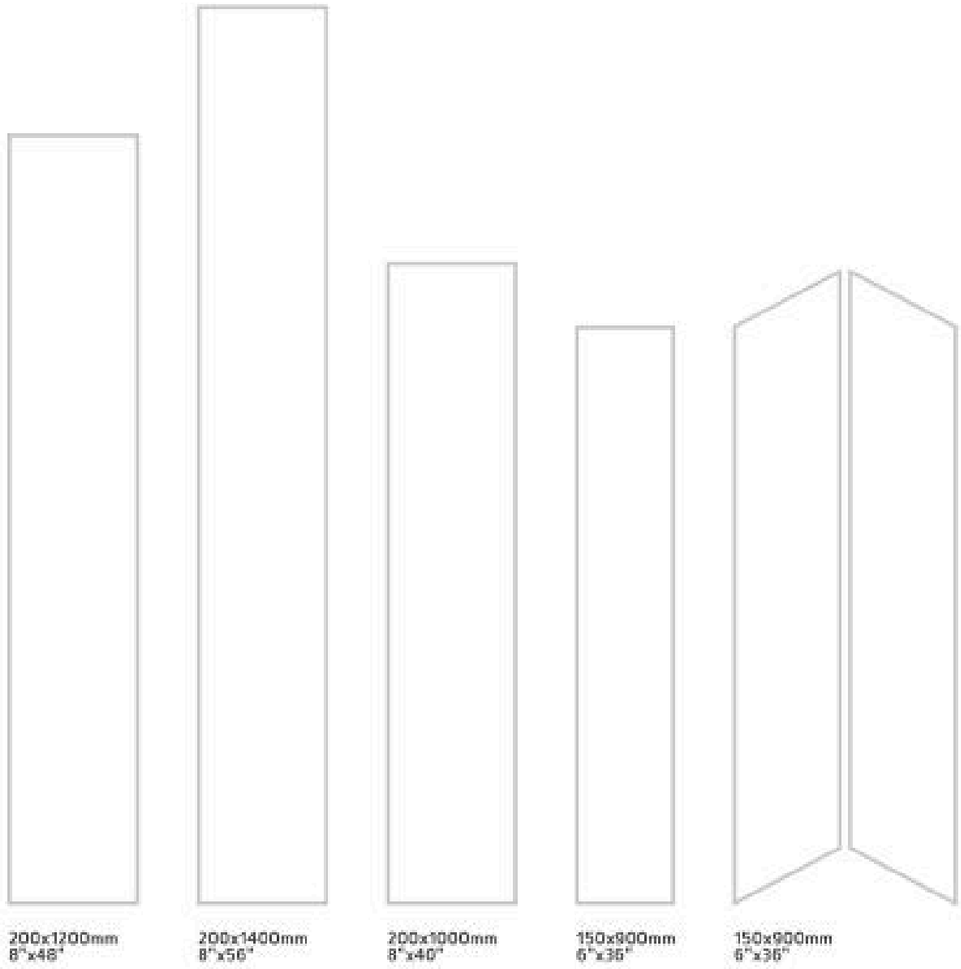

At Metro, we believe in reviving that connection. Our Non-rectified Curve Edge Plank tiles bring the raw, unrefined beauty of wood into your home. With every tile, you experience nature's true essence, bringing authenticity and warmth to modern spaces.

METRO
ARTE CERAMICA

Our Product Is Our Greatest Accomplishment

Metro Ceramic Plank Tiles are designed to deliver the greatest quality, inspired by a tradition of exceptional craftsmanship. Our ceramic planks are made from excellent raw materials and fired at temperatures beyond 1,200°C, resulting in remarkable strength and durability. Metro's plank tiles are designed to satisfy the changing needs of modern spaces, providing not only aesthetic appeal but also practical quality.

Our ceramic planks do not require any post-installation treatment, are devoid of hazardous chemicals, and emit no volatile organic compounds (VOCs), making them safe for both your home and the environment. Metro Ceramic Plank Tiles have almost no porosity and are resistant to stains, bacteria, mold, and odors, making them a sanitary and long-lasting choice for any room. Metro provides sustainable, high-performance flooring that blends timeless design with cutting-edge innovation.

Our Vision And Commitment

Preserving Nature

Metro is extremely devoted to preserving nature with each plank we manufacture. In an age where environmental sustainability is more important than ever, we have made it our aim to provide flooring solutions that minimize the environmental footprint. By substituting actual wood with innovative, eco-friendly materials, we help to conserve forests and biodiversity from the devastation caused by deforestation.

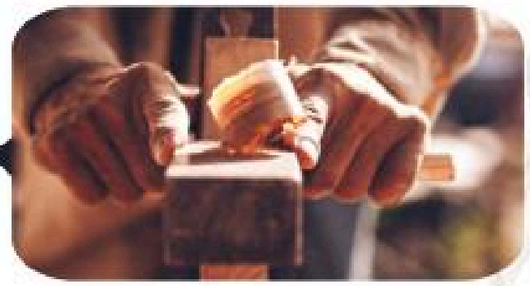

Sustainability Is In Focus

Metro places sustainability at the heart of all we do. We are committed to reducing our environmental effect through the use of eco-friendly products and energy-efficient manufacturing procedures. Our wooden plank tiles are intended not only to give great quality, but also to encourage responsible living by minimizing dependency on natural wood. By concentrating on sustainability, we ensure that our goods help to make the world a greener place while maintaining style and durability.

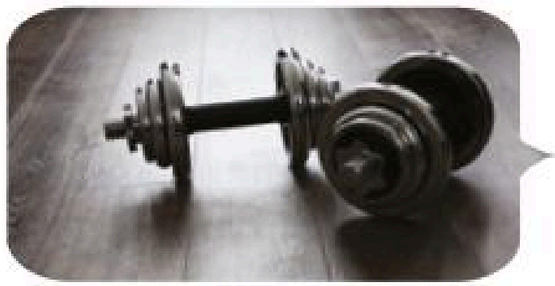

Eco-friendly Materials & Processes

Our products are crafted using sustainable materials and environmentally conscious processes. Each step minimizes waste and reduces the ecological impact.

Designed For A Long-lasting Impact.

Our planks are designed to be both durable and beautiful, providing long-term value. They contribute to the design of useful and environmentally friendly spaces.

Timeless Aesthetics, Enduring Strength

Our plank tiles strike an ideal combination between attractive design and exceptional strength. They deliver timeless beauty that can withstand daily wear.

Advanced Technology Meets Artistic Craftsmanship

We mix cutting-edge technology with master craftsmanship to achieve perfection. This synergy produces flooring that is both beautiful and functional.

Why Architects Choose Metro Wooden PlanksTiles

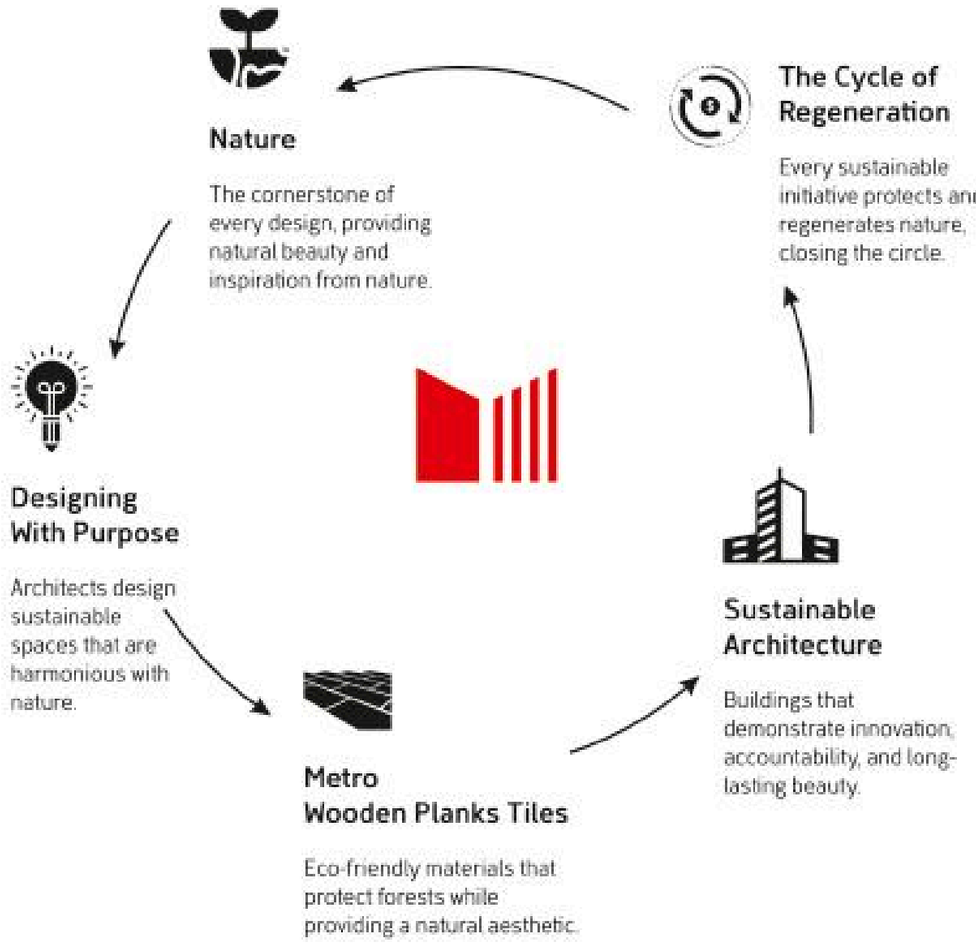

Eco-Friendly Flooring with Design and Impact

For architects, the process of creation is more than just constructing spaces; it is also about shaping experiences and instilling meaning in the fabric of existence. Metro wooden plank tiles align with this deeper idea. They are more than just materials; they are an intentional choice that reflects the architect's responsibility to strike a balance between beauty and sustainability.

Architects that use Metro Wooden Plank Tiles share a vision of design that values nature while uplifting human spaces. Each plank embodies the spirit of natural wood, yet it is designed with the future in mind: sustainable, enduring, and purposeful. Architects see beyond the surface, understanding that their creations are intended not only for today but also for future generations.

The Cycle of Sustainable Design and Nature

Nature inspires architectural design, prompting architects to create environments that are harmonious with their surroundings. Metro Wooden Planks Tiles contributes to this aim by providing eco-friendly products that imitate wood without damaging forests.

These sustainable designs provide structures that are both attractive and responsible, helping to safeguard and regenerate natural resources and thereby complete the sustainability cycle.

METRO
ARTE CERAMICA

Interior Designer And Architect Experienced

Riddhi Khosla
Interior Designer

Metro is a fantastic brand of wooden tiles, and I particularly appreciate their tiles with curved edges that give the appearance of real wood flooring. Their combination of marble and wood looks wonderful as a highlighter in a variety of settings. I strongly suggest these.

Ar. Thomas Joseph TJDC Ltd,
Kochi, Kerala

When I visited the Metro Group's Experience Center, their items stood out as distinct from standard hardwood tiles. They provide a variety of creative goods that are remarkably similar to real wood textures and surfaces. Everyone should visit and try these products since they offer excellent value for money in architectural and interior design needs.

Ar. Sarthak Imaarat & Design Studio, Panipat, Haryana

I've been with Metro for 8 years and am continually delighted with their selection of hardwood tiles. They provide a diverse assortment of designs, textures, and sizes to meet any demand. Also, their new wooden tile concept is rather fantastic.

Ar. Shubham Kumar
SK Design Karnal, Haryana

I'm very pleased to try Metro items. They have fantastic timber designs, and I am excited to incorporate them into both interior and external spaces in residential and commercial buildings. Metro's hardwood tiles are ideal for any project, providing exceptional value for money, quality, and longevity. I strongly suggest these.

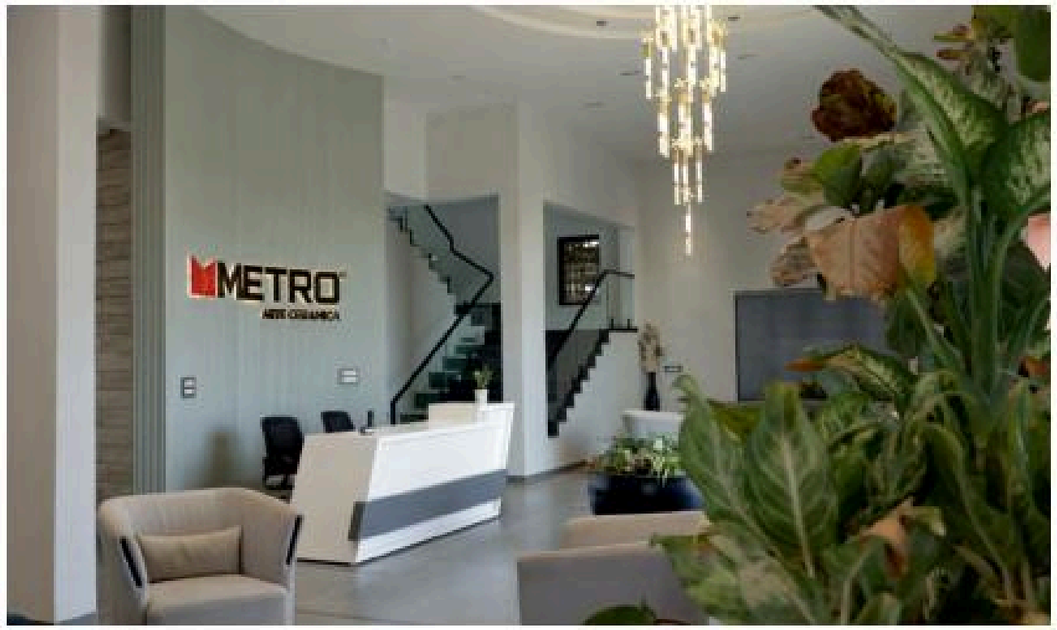

Ar. Piyush Gulati

I am using products of Metro Group for a long time. Metro has very good wood finishes and detailed wood grains that actually feel like real wood, even though they are tiles. I highly recommend Metro Group to everyone, especially for the new marble and stone fusion they have introduced.

Our Experience Center

Our experience center is more than just a showroom; it's an immersive experience that invites you to discover the creativity and innovation that power our sustainable flooring solutions. Here, you can see firsthand the elegance and versatility of Metro Wooden and Ceramic Planks, which are meticulously designed to change interiors with both beauty and function.

Partner With Metro:

Join Us In Creating A Sustainable Future.

Metro believes that the future is something we build together, rather than something we inherit. We encourage you to join us on our adventure to create a society in where sustainability, innovation, and beauty coexist harmoniously. As we create timeless and environmentally responsible products, we seek partners who share our aim of creating inspiring and long-lasting settings.

Partnering with Metro means committing to quality, integrity, and sustainable practices that will have a long-term impact on the planet. Together, we can create a future in which design and responsibility go hand in hand, leaving lasting legacies.

Let's work together to transform possibilities into realities and change the way we think about design, one sustainable option at a time. Together, we can construct more than simply structures; we can create a future that we are happy to share.

Experience
Your self

Metro Wooden Planks delivers great quality and sustainable craftsmanship at a location near you. You have the opportunity to try our products directly at entrepreneurs around India—feel the textures, discover the designs, and see how Metro can alter your interiors with style and responsibility.
